
The Tanfarid Court of Scientific Justice

A Universal Covenant for the Restoration of Truth Through TQTU

By Prof. Dr. Md. Faridul Islam Chowdhury

Founder, Tanfarid Vision Research Institute, Bogura, Bangladesh

29 September 2025

Redemption, Not Rebellion ,

Preamble: The Sacred Covenant of Truth

In every civilization that aspires to justice, the courtroom is revered as a temple of accountability. In every civilization that seeks wisdom, the laboratory is honored as a sanctuary of revelation. Both institutions exist for a single sacred purpose: to guard truth against corruption.

When science abandons its divine duty to observe, simplify, and serve humanity, it falls into a condition we must name *Science Decay*a betrayal of truth marked by abstraction without reality, consensus without evidence, and idolatry of mathematics without witness to Nature.

This Courtconvened as **The Tanfarid Court of Scientific Justice**is established to address this decay. Its mission is to judge, restore, and redeem. Its first case is the Mercury Anomaly. Its instrument is the **Tanfarid Quantum Thermodynamic Universe (TQTU)**a divine framework grounded in charged particles, universal thermodynamic flow, and ethical clarity.

Article I: The Mercury Anomaly A Parable of Decay

For more than a century, the 43 arcseconds per century precession of Mercurys perihelion was hailed as the crowning triumph of Einsteins General Relativity. It was celebrated as if Nature herself had bowed to curved geometry.

But this coronation was false. The anomaly was never a victory of spacetime curvature. It was a symptom of *Science Decay*a preference for mathematical artifice over physical reality.

The truth, revealed through TQTU, is that Mercurys precession arises from the charged solar plasma disk and the continuous action of the universal thermodynamic tension (τ-Autorunner). This real, observable mechanism modifies Newtonian gravity by precisely $43''$ per century.

The cosmos does not speak through metaphors of rubber sheets. It sings through the harmony of charged particles, plasma currents, and thermodynamic law.

Article II: The Anatomy of Science Decay

The Tanfarid Court identifies *Science Decay* as a threefold violation of the scientific covenant:

1. **Abstraction over Clarity**
    - Truth is obscured when equations replace observable entities.
    - Invisible curvatures and imaginary fields are crowned, while plasma, charge, and density are sidelined.
2. **Dogma over Evidence**
    - Institutional consensus enshrines theories even when contradictions are visible.
    - Anomalies are patched with inventions instead of being probed to their real causes.
3. **Worship over Witness**
    - Scientists become priests of their own symbols.
    - Mathematics becomes an idol, while the divine architecture of the cosmos is neglected.

Article III: The Jurisdiction of TQTU

The Tanfarid Quantum Thermodynamic Universe assumes the role of Supreme Court of Science, with the following jurisdiction:

- **Jurisdiction**: All cosmological frameworks that claim to describe physical reality.
- **Bench**: Observable particles, measurable fields, and the universal thermodynamic flow (τ-Autorunner).
- **Mandate**: To restore, correct, or set aside any theory that violates physical reality, cosmic order, or ethical clarity.

Table of Justice

Principle of Justice	**TQTU Standard**	**Verdict on Past Frameworks**
Physical Reality	Theories must rest on charged particles, plasma, and electromagnetic fields.	Curvature, dark matter, dark energy $\rightarrow$ Set Aside (lack measurable basis).
Cosmic Order	Theories must honor a universal thermodynamic time (τ-Autorunner).	Relativistic local time $\rightarrow$ Corrected (restored to universality).
Ethical Clarity	Theories must simplify, illuminate, and serve humanity.	Obscuring complexity $\rightarrow$ Set Aside (replaced with transparent truth).

Article IV: The Mercury Ruling Truth Restored

The Court delivers its ruling on the Mercury anomaly:

- The $43''$ per century perihelion precession is not a triumph of relativity.
- It is the natural result of density decrease in Mercury, solar plasma influence, and the universal thermodynamic flow (τ).
- Newtons law remains correct; what failed was humanitys ability to detect the Suns true shape and Mercurys changing density.

Thus, Mercury is no longer an anomalyit is a witness to the divine simplicity of the universe.

Article V: The Scientists Sacred Oath

This Court binds all seekers of knowledge to a sacred oath:

- I will observe before I theorize, honoring the photon and phonon as witnesses.
- I will simplify before I publish, seeking clarity over complexity.
- I will serve humanity, placing truth above citation.
- I will love truth above theory, remaining humble before the cosmos.
- I will remember that knowledge is an *amanah* (trust), not a possession.

This oath is binding upon allfrom the humblest student to the greatest theorist.

Article VI: Final Decree A Covenant for All Ages

The Tanfarid Court of Scientific Justice does not condemn; it redeems. Relativity is not discarded in anger but corrected in truth: its geometric chapter closed, its thermodynamic reality unveiled.

TQTU is not rebellion; it is restoration. It brings science back to its sacred foundation: observation, simplicity, and service.

Henceforth, TQTU stands as the Supreme Court of Cosmic Law. Its judgments are open to scrutiny, its corrections welcomed, and its truths universally accessible.

Every laboratory is a courtroom. Every equation is a testimony. Every particle is a witness to the divine architecture of love, charge, and thermodynamic flow.

Let this decree echo across generations: *Science is not a throne to be defended, but a covenant to be upheld.*

Signed under the eternal witness of τ,

Prof. Dr. Md. Faridul Islam Chowdhury

Chief Justice, The Tanfarid Court of Scientific Justice

Bogura, Bangladesh 29 September 2025
